Pistachio kernels grade s

Green Kalk pistachio kernels, Grade S, have a high volume of exports, and this has attracted the attention of many exporters. Green Kalk pistachio kernel exporters use all grades of this product to ship to different countries, but Grade S has been welcomed by people in different countries due to its wonderful green color

Characteristics of Pistachio kernels grade s

The most important characteristic of this product is its unique green color and the absence of any blemishes on it. Producing this type of pistachio kernel is time-consuming. The importance of this green color and the absence of blemishes is such that all the kernels are carefully separated before packaging

Pistachio kernels grade s

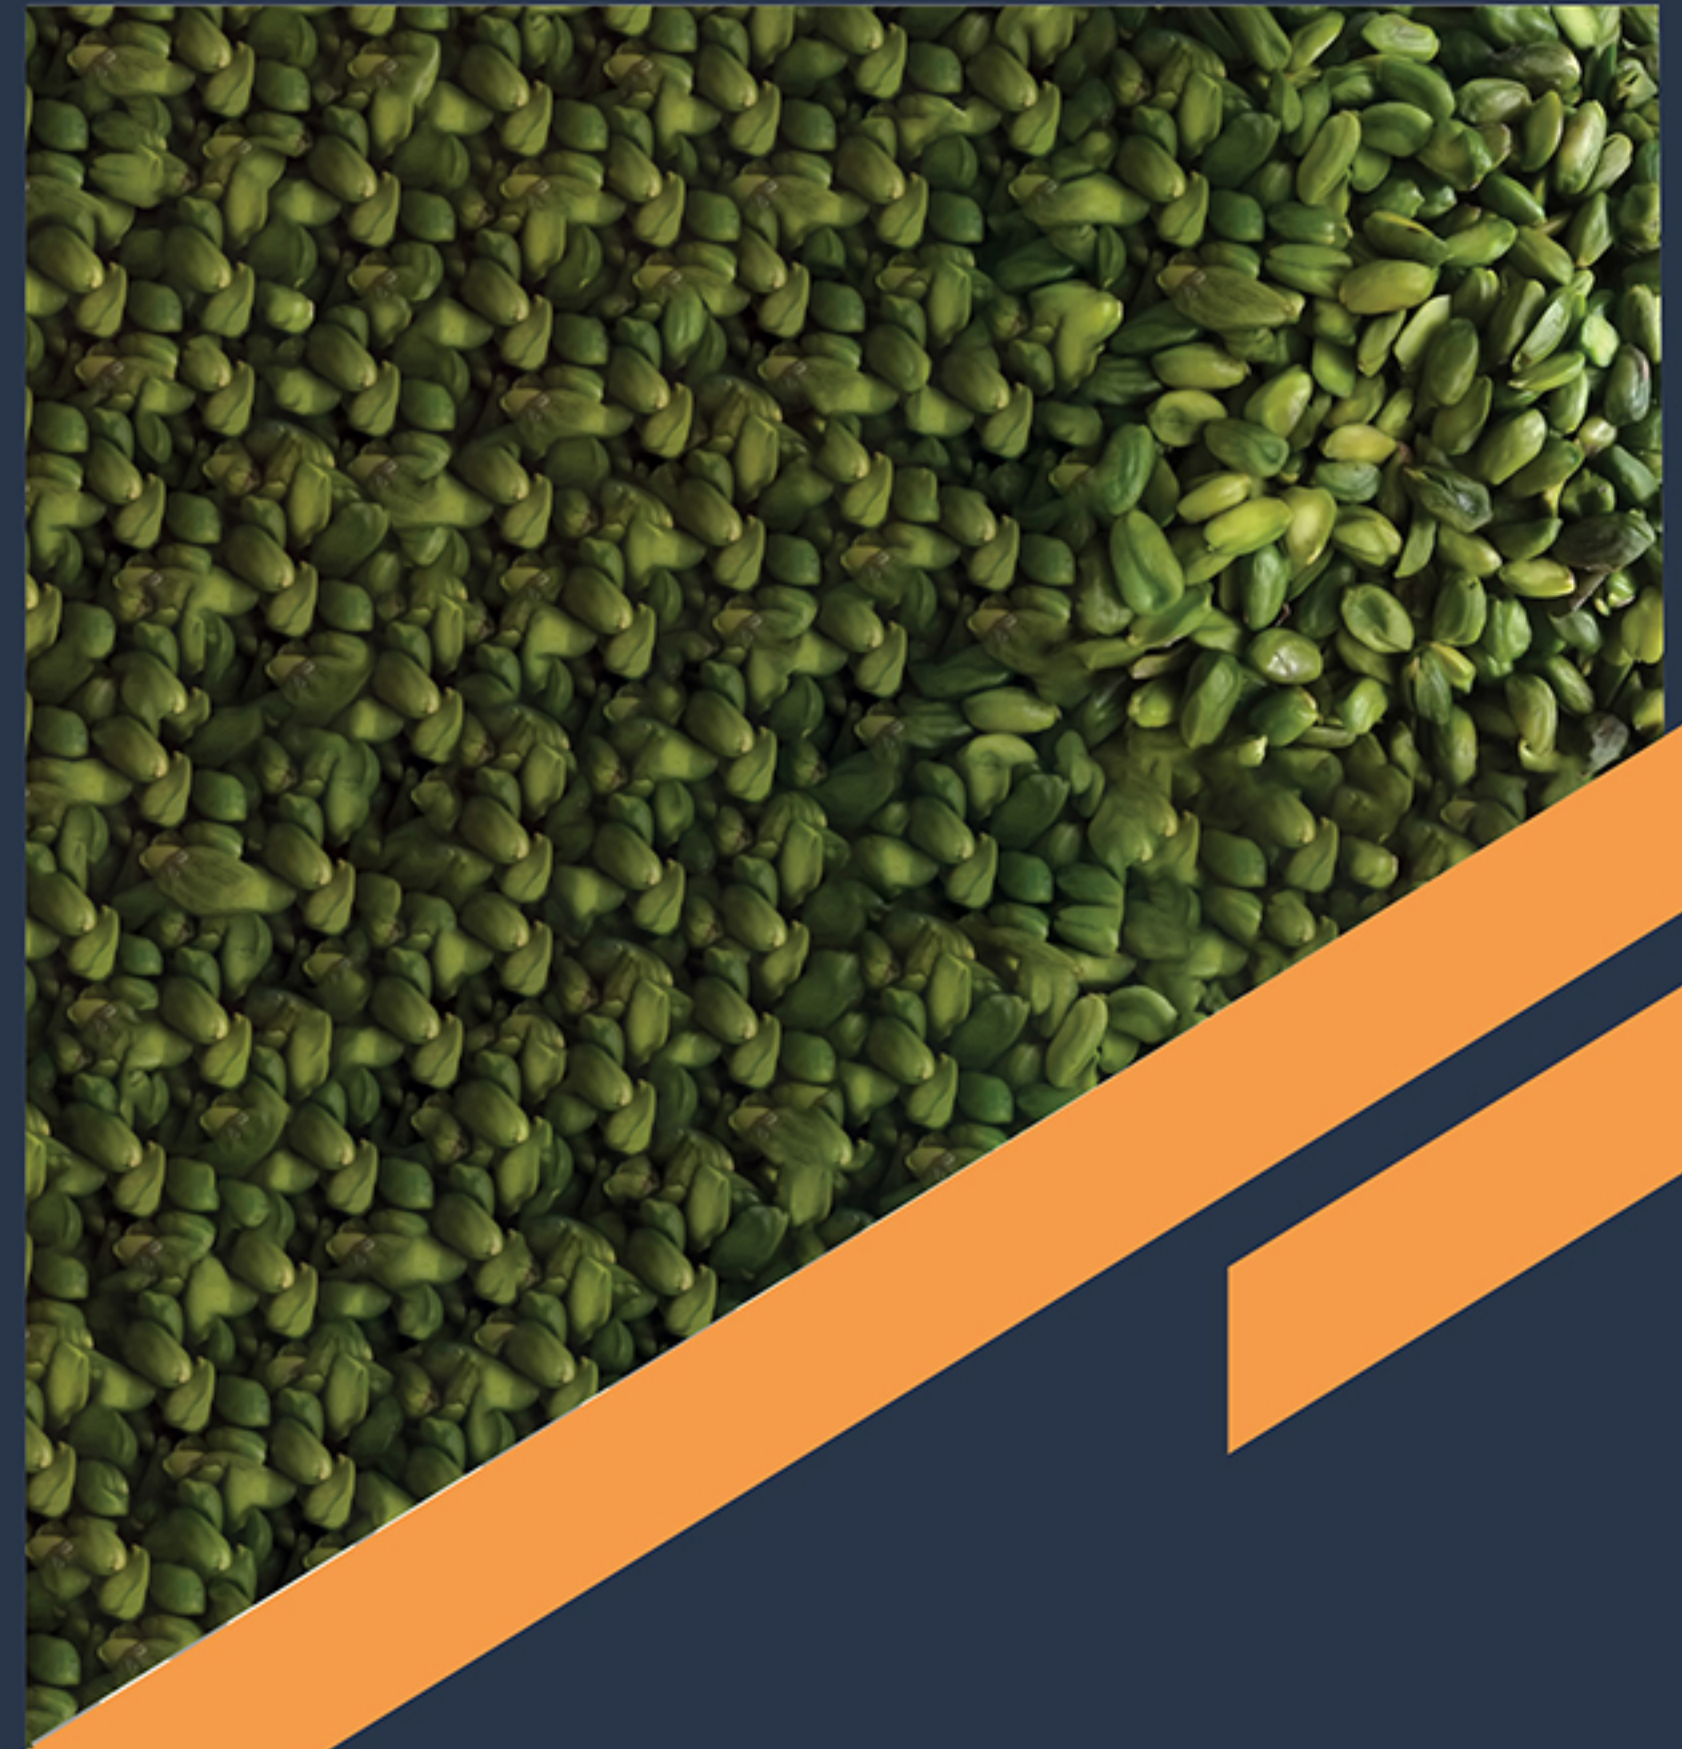

Grade A pistachio kernels

Green-skinned pistachio kernels grade a are obtained from unripe
.pistachio kernels after peeling

Unripe pistachio kernels are carefully selected from the trees when
they are not ripe and then undergo peeling processes that expose
.the green kernels

Characteristics of Grade A pistachio kernels

Different grades meet the different needs of food industries such as
.ice cream, chocolate, confectionery, bakery, sausage and ham, etc
They are considered luxury items due to the costly and
time-consuming production process

Grade A pistachio kernels

Pistachio kernels grade b

Iranian green kernel pistachios are obtained through the harvest of unripe pistachios, when the kernel is not yet yellowed. The green seeds are then sun-dried and shelled. The seeds are then dipped in boiling water and the outer layers removed. The kernels can then be sorted according to their greenness, with a premium to be paid for the most intensely green hues.

Characteristics of Pistachio kernels grade b

The most important characteristic of this product is its unique green color and the absence of any blemishes on it. Producing this type of pistachio kernel is time-consuming. The importance of this green color and the absence of blemishes is such that all the kernels are carefully separated before packaging.

Pistachio kernels grade b

Pistachio kernels grade c

These pistachio kernels are grade C. This means they are brighter than grades A and B and darker than the other grades. They are effortless to use; you can use them right out of the pocket or as a .decorating item

Characteristics of Pistachio kernels grade c

This green kernel pistachio is used for confectionery purposes due to its rich color and flavor profile. It has a higher value than the usual pistachio nut due to the costly process of harvesting and producing them. The price scales with the intensity of greenness. Iranian green kernel pistachios are widely regarded as a luxurious food item and are used in a diverse assortment of dishes, including pastries, .chocolate, ice cream, sausages, and more

Pistachio kernels grade c

Mechanical Khandan Pistachio

Mechanical Khandan Pistachio contains pistachios from the bottom .of Khandan, which is not observed in the natural Khandan type
There is no reason for it to be cheap, the red flower color of the .pistachio and its taste are clearly weakened in the Abkhandan type
The inner layer of the skin of the Abkhandan pistachio is sometimes .darker than the natural Khandan types

Characteristics of Mechanical Khandan Pistachio

Smiling pistachios are a type of pistachio that is naturally chewy and is commonly used in a variety of nuts. Smiling pistachios are without the original shell and their underlying shell is open, leaving the .pistachio kernels completely visible and distinct

Mechanical Khandan Pistachio

Characteristics of Hazeland Pistachio

The tip of the green fruit is very short, its skin color is green and at the time of the arrival of the dark purple and red fruits. The length of mm (medium) dry pistachio. 72.1 .mm (low) 24.1 the dry pistachio is mm (high) so that the diameter 66 The diameter of the pistachio is and width are equal . The position of the skeletal bone on both the back and the abdominal side has been measured, and the gap is visible on the green skin. The reddish color of the purple brain and .the skin of the bony skin cream

Hazelnut pistachio

Ram head pistachio

The fame of the ram's head pistachio is due to its high percentage of smiling, as well as the large size of the brain and its very good taste.

It can be said that ram head pistachios have the highest weight among other types. The quality of this variety is at an average level and therefore it has a good sale in the market. This type of pistachio has a white bone color with medium dark color

Characteristics of Ram head pistachio

Due to its appearance, this pistachio is considered one of the large pistachio varieties and is round or hazelnut-shaped. The ram's head pistachio has a special depression in the head of its bone shell, which distinguishes it from others. This pistachio is one of the commercial and economic varieties of pistachio in Iran. This type of pistachio, together with Akbari pistachio, is one of the most expensive types in the market

Ram head pistachio

Sliced pistachio kernels

We've always heard the word "slice" for pizza or cake. You probably would think of something delicious that is bigger than pistachio. So what is sliced pistachio? A Pistachio slice or sliced pistachio is obtained by separating the pistachio shell and cutting the kernel into small pieces

Characteristics of Sliced pistachio kernels

:The common features of high-quality pistachio slices are

- The intensity of the green color of the kernel

- Uniformity of appearance

- Fat content

- Lack of crushed and small pieces

Due to the high demand for the green color in sliced pistachios, providing them in various forms with the highest quality can be a wise consideration to grab customer attention and trust. To reach this goal, picking the proper kernel is the main key. This is one of the main factors that enable you to compete in this field

Sliced pistachio kernels
